

DYNA-KING, INC.[®]

World's finest handcrafted flytying vises

TUBE FLY 2002

The Tube Fly 2002 is machined with a combination of stainless steel & brass and is fitted with precision ball bearings for smooth rotation. A knurled friction screw is conveniently located on the side of the vise to control rotational drag.

Included with every vise are three sizes in collets .042", installed in the vise, .062" & .125", four mandrels .031", .041", .062" & .125". & a sample of HMH tubes (while supplies last)
